

# **NA-IT Inventory Management System**

**Submitted by: Sri Krishna Devi, Zainab Shakeel**

**Interns IT wing**

**Date: 30-07-2025**

## **What is it?**

A web-based system to track and manage IT equipment like computers, laptops, monitors, and other devices.

## **What does it do?**

- Track all IT equipment with details (brand, model, serial number, warranty)
- Issue equipment to employees and track returns
- Monitor warranty end dates
- Provide different access levels for admins, operators, and management.

## **Key Features:**

- Simple web interface
- Real-time equipment status
- Search and filter capabilities
- Secure user access
- Complete audit trail

## **Who uses it?**

- **Admins:** Full access to all modules.
- **Operators:** Add/edit items, issue/ receive items

- **Management:** Can view reports only.

### **Why use it?**

Replaces paper records and spreadsheets with a centralized digital system that prevents equipment loss, ensures proper tracking, and provides instant visibility of inventory status.
